

VHP 2000

- Solid State SCSI Disk
- Application Booster

Very High Performance

- 50 to 100 times faster than any SCSI disks.
- A new standard in fast access disk
- When memory upgrade(s)/adding memory do not help
- When no improvement by adding memory chips
- Once qualified no need for multiple qualifications : same architecture

MAIN FEATURES

- 50 to 100 faster than a magnetic disk
- Data access time # 0.1 millisecond
- Up to 12 Gbytes capacity
- SCSI interface
- Very high reliability
- Small but very fast
- Performance I/O booster
- CPU utilization optimized
- Technology of the future

APPLICATIONS

- Relational data base server
- High speed swap/overlay files
- CAD/CAM
- Video Systems application
- Internet Services
- Graphics application (radar)
- System files : page & swap files, databases indexes, temp files...
- Confidential data storage
- Commercial processing
